

Subject: Submission: Zambia Macroeconomic Analysis and impact of Debt restructuring (2015–2025)

Dear Ms. Chama, Mr. Spratt, and Dr. Shale,

Please find attached the final Executive Report and the corresponding Power BI dashboard regarding Zambia's macro-fiscal transition from 2015 to 2025.

The primary objective of this analysis was to evaluate the structural shifts in the Zambian economy following sovereign debt restructuring, specifically focusing on the restoration of trade resilience and the resulting surge in investor confidence.

I have incorporated specific recommendations regarding industrial value-addition and agricultural diversification to act as fiscal hedges against future commodity price shocks.

I look forward to your feedback on these findings and am available to discuss the findings and insights at your convenience.

Best regards,

Baldwin Mweemba
