

Dear Ms. Clemens Chama, Mr. Darren Spratt, and Dr. Moliehi Shale,

Re: Independent Analysis Submission

I am writing to share my independent analysis assignment with you. For this assignment I sought to assess the prevalence rates of Non-Communicable Diseases in Zambia from the year 2019 to 2022.

My goal with this analysis was to observe the trends in prevalence rates over the years for males and females and uncover insights such as the proportion of the diabetic individuals receiving treatments.

Feel free to review my Power BI Report and my Summary. I hope you find it insightful.

I look forward to receiving your feedback.

Warm regards,

Joanna Imasiku.
