

Subject: Impact of Health Expenditure (Per Capita, PPP and % of GDP) on Life Expectancy in the world (2000 – 2023) - Ronald Chibale

Dear Ms. Chama, Mr Spratt, and Dr. Shale,

I hope this email finds you well.

Please find attached two documents, Power BI file report and PDF summary. The focus is on seeing if there is any correlation of life expectancy at birth to current health expenditure per capita, PPP (current international \$) and domestic general government health expenditure (% of GDP) of the countries in the world. The dataset I used for the analysis were from the World Bank for the years 2000 to 2023.

Your feedback to my work will be highly appreciated. I look forward to discussing this work with you.

Kind regards,

Ronald Chibale
