7th April 2026.

Dear Mr. Spratt, Dr. Shale, and Ms. Clemens,

I have been analyzing the agriculture product imports, and exports dataset for the period 2013 to 2022. Agriculture products are a growing contributing factor towards the National Gross Domestic Product ( GDP).

My aim is to compare the imports, and exports from 2013 to 2022 and find out the top ten products from each. The findings and insights are in the summary file attached together with the Power BI file as a supplement with visualizations.

I look forward to further discussing the dataset with you.

Yours Sincerely,  
Daniel
