

Greetings Mr Spratt, Ms Chama and Dr Shale,

RE: PBI Independent Analysis Submission – Emmanuel Mungungu

Please find attached to this letter a Power BI report that has my analysis on GDP values for five SADC countries (Zambia, Zimbabwe, Angola, Malawi, and South Africa) across ten years (2015 to 2024).

I have conducted this analysis to understand the structure of GDP across different economic sectors, and to determine whether there are any dependencies on any sector and/or activity.

Also attached is a PDF file that gives a summary of the findings and the implications and a Markdown file that has a brief description of the topic, the data source, and key insights.

I look forward to our engagement on this analysis.

Kind regards,

Emmanuel Mungungu.
