

Subject: Data Analysis Assignment Submission - Blessings Chinyama

Dear Ms Clemens Chama, Mr Darren Spratt, and Dr Shale,

I hope you are well.

I am writing this email to submit my individual data analysis assignment.

The topic of my analysis was: Global demographic trends (1965- 2023): Developed vs developing countries.

The dataset I analysed was from the UN website.

The link is down below:

<https://population.un.org/wpp/downloads?folder=Standard%20Projections&group=Most%20used>

The key variables of my analysis were population growth rates, fertility rates, mortality rates, and life expectancy.

This analysis is relevant because it uncovers the socioeconomic implications of demographic trends such as healthcare demand, education planning, pension systems, and labour demand between developed and developing countries.

Please find attached two documents: the Power BI report for the analysis and a PDF file summarizing my findings.

Kind regards,

Blessings Chinyama.
